2x 14" Carbon Fiber Rod

4" Grip Rod

microMount with spud

ultraCage Rear Chassis

ultraCage DSLR (Front)

ultraCage | blue Studio Additional Options

Double Top Handle and Thumbscrew
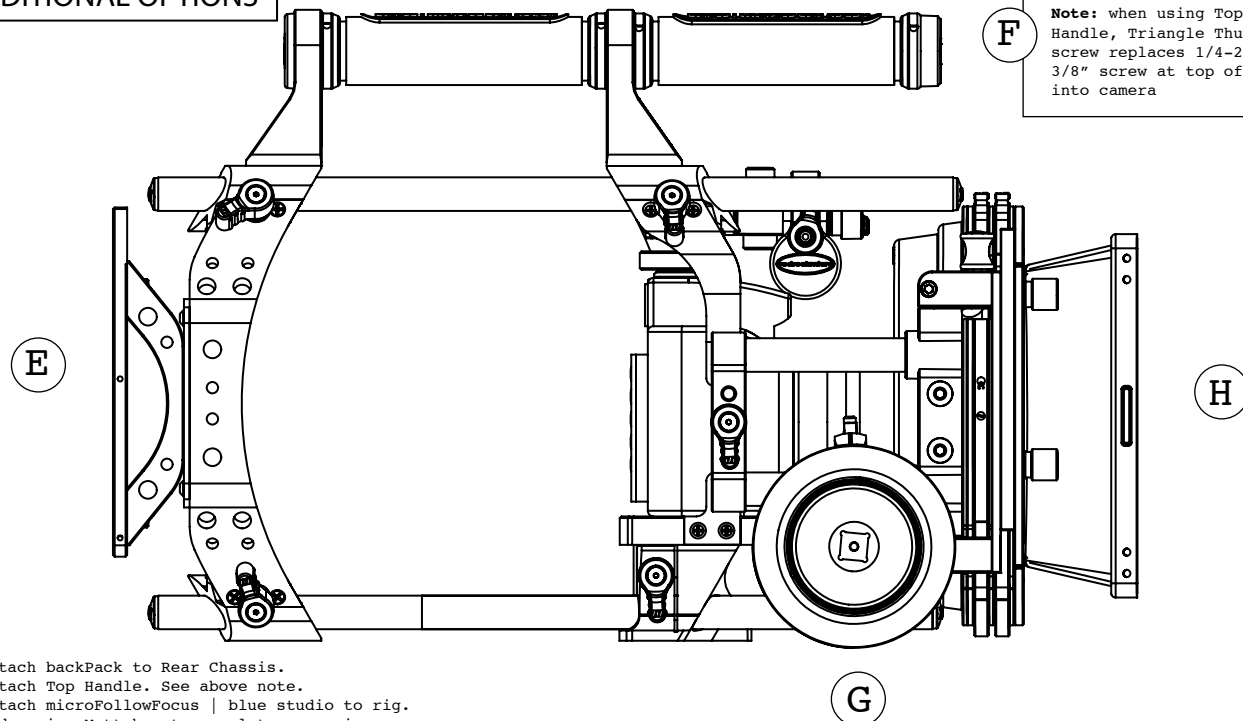

microFollowFocus | blue Studio

backPack

microMattebox

A: Insert 14" Rods into top clamps of both front and rear cage.
B: Attach microMount to Grip Rod, then Grip Rod to rig. Attach an external monitor (not provided) to microMount Spud.

C: **QUICK RELEASE option:** Insert four 9" Rods into ultraCage as shown. This makes it easy to toggle between handheld and studio modes.
D: **EXTENDED option:** Insert 18" Rods into bottom clamps of ultraCage. For studio mode, this provides maximum stability.

ADDITIONAL OPTIONS

Note: when using Top Handle, Triangle Thumb screw replaces 1/4-20 x 3/8" screw at top of cage into camera

E: Attach backPack to Rear Chassis.
F: Attach Top Handle. See above note.
G: Attach microFollowFocus | blue studio to rig.
H: Add a microMattebox to complete your rig.
